PENTAIR ANNOUNCES RE-ENGINEERED STA-RITE® CABLE GUARDS
4" SUBMERSIBLE PUMPS EASIER AND QUICKER TO INSTALL

DELAVAN, WIS. — March 10, 2014 — Pentair Ltd. (NYSE: PNR) announced today the upgrade of all Sta-Rite HS Series 4" submersible pump cable guards. These cable guards have been re-engineered for ease of installation and increased durability.

The HS Series cable guards underwent a significant improvement process - led by Pentair Engineers and guided by customer feedback. Upgrades to the HS Series cable guards include thicker stainless material for greater durability, rounded corners for improved safety, wider channels for ease of wire placement, and universal screws to work with a wider variety of tools*. According to Taylor Crenshaw, Pentair Marketing Specialist, "These enhancements reflect Sta-Rite's commitment to product quality and continuous improvement. Most importantly, they make the installer's job quicker and easier – freeing them up to make more calls per day."

NOTE: These improvements do not change the outside diameter of the pump.

A new Sta-Rite literature piece describing the cable guard improvements can be ordered at www.delzer.com/pentair (part number S11134WS). More information on the Sta-Rite HS Series, including where to buy, can be found at www.sta-rite.com.
