PENTEK INTELLIDRIVE™

CONSTANT PRESSURE CONTROLLER

CONSTANT PRESSURE FOR WELL PUMP SYSTEMS

For use with both Submersible and Above Ground Well Pumps to Control Changes in Water Demand

Most homeowners with well systems know what happens when demand for water changes. If they're taking a shower, water pressure drops when someone starts the dishwasher or turns on a faucet. Weak showers, unclean dishes and other water pressure problems become frustrating daily experiences.

A "Variable Frequency Drive" for Submersible or Above Ground Well Pumps.

The **PENTEK INTELLIDRIVE** Water Pressure Control Center directs changes in pump motor speed, responding to fluctuations in demand. If water pressure starts dropping, an electronic pressure transducer signals the drive to accelerate the pump motor to increase water volume going into the home.

The Benefit? Strong, equal pressure, everywhere.

Homeowners will recognize the difference right away. Water flows smoothly and evenly throughout the home. Regardless of changes in demand, water pressure stays the same: in the shower, the dishwasher, and from every other faucet and fixture.

And when homeowners are outside, they'll enjoy a lush, green lawn and landscaping. Sprinkler systems will perform at their best, with consistent spray patterns, constantly pressurized to achieve complete coverage.

The pump and motor will last longer.

PENTEK INTELLIDRIVE features "Soft Start/Coast to Stop" design, which minimizes mechanical stress. And during long-running applications like lawn irrigation, pressure-cycling is eliminated...another system stress reducer.

PENTEK INTELLIDRIVE Leading-edge technology for a premium residential water system that makes life better!

How PENTEK INTELLIDRIVE™ works

- 1 PENTEK INTELLIDRIVE** is connected to an Electronic Pressure Transducer, and to the submersible pump.
- 2 PRESSURE TANK** this properly sized tank is installed between the pump and the pressure transducer. The minimum size tank recommended is 2 gallons.
- 3 PRESSURE TRANSDUCER** measures changes in system pressure continuously, and sends electronic signals to **PENTEK INTELLIDRIVE**.
- 4 WHEN PRESSURE DROPS** **PENTEK INTELLIDRIVE** responds by increasing pump motor speed and water flow; first from the pressure tank, then directly from the well.

- 5 INCREASED WATER FLOW** maintains constant pressure wherever it is needed throughout the home.
- 6 DECREASED DEMAND** when signaled by the pressure transducer, the pressure tank is replenished, and **PENTEK INTELLIDRIVE** responds by reducing or shutting off water flow. Once water flow shuts off, the system returns to monitoring phase until the next demand for pressure adjustment.

COMPETITIVE PRODUCT COMPARISON

OPERATING RANGE

2-Wire, 3-Wire and 3-Phase in same unit

3-Phase Output (60Hz/80Hz)**

COMPETITION:

Most competitors offer separate units for 1-Phase and 3-Phase outputs.

NUMBER OF MODELS

NEW! Just four models will meet all your needs, reduce inventory requirements and simplify product selection.

COMPETITION:

Some competitors offer as many as 11 different models.

ADJUSTABLE PROGRAMMING PARAMETERS

34 different parameters can be adjusted. Provides ultimate flexibility to fine-tune system operation.

COMPETITION:

Competitors offer no more than 6 adjustable programming parameters.

60Hz operation is recommended as the industry standard. Intermittent 80Hz operation is an acceptable option.

** Ongoing 80Hz operation may reduce the life of the pump and motor.

GROUND DETECTION

Detects and displays when there is a grounding problem.

COMPETITION:

No competitor offers this technology.

FULLY PROGRAMMABLE DRIVE

Easily programmable for a variety of applications and specific settings. SD Card Slot for easy updating of software enhancements when provided by Pentair.

COMPETITION:

Most competitors offer factory-configured settings, which limit flexibility.
